

PRINTING FILE PROFESSIONAL CHECK UP

What is a professional check up on your printing file?

Our technician will always check your file to:

- verify its size
- verify the fonts
- convert pantone colours into four-colour reproduction
- verify that white colour is not overprint and punch hole
- verify that black colour is overprint and that is composed of 100% black
- verify that resolution is not lower than 72 dpi
- verify the bleed line
- verify the distance of graphics item from the trim line
- verify the orientation of front and back
- verify the spine size and number of pages
- verify the right settings of folds (if folding is requested)
- insert the certification logos in the suggested position
- verify that the contents are in line with point 11 of our Sale Terms and Conditions
